Subject: Data from PLP

I am in the process of writing a letter for Dennis McLarren's signature (the Region 10 RA) to PLP asking for their data. We will first ask for a list of all their data. We will also ask for specific data sets that we know they have and we need. Below is the list of data I am including in the letter so far. Would you respond to this email as soon as you can listing any other information you would like from them in the short term? If I have covered your needs would you repond to that effect so I know you go this?

Thanks

hydrology (surface and groundwater),
geochemistry of the Pebble deposit, the surrounding areas and any other deposits you might have explored in the Bristol Bay Watershed,
drill bore logs,
fish distribution and ecology,
traditional uses and traditional ecological knowledge of Alaska Natives,

(b) (5)
